SUMMARY

Progressive Android Developer with more than 3 years experience. My approach is creation of stable, functional and user friendly mobile apps by writing clean, structured and effective code. I always keep in touch with new technologies and follow SOLID principles.

WORK EXPERIENCE

02.2017 – Present, Visitech (integrated safe system of work), Moscow Android Developer

- Development from scratch b2b application
- Create custom view components
- Use of Clean Architecture approach in application design
- Use MVP in UI layer
- Work with OkHttp, ButterKnife, Gson and AutoValue libraries
- Use Kotlin together with Java
- Use Jira, Confluence and Bitbucket
- Use web sockets for push notifications
- Write of unit tests
- Use TeamCity for automatic build and testing

01.2019, Center for gifted education SIRIUS, Sochi Teacher of the educational program «Classical programming and mobile development»

- Conduct workshops, seminars and lectures
- Help the teams of school students to work on their projects
- Assess students work

04.2016 – 12.2016, Coffice (coffee capsule distribution), Moscow Android Developer

- Applications interface design according to Google Material Guidelines
- Rest API development for client-server communication
- Maintenance of API on Github up-to-date documentation
- Work with a Bank API and implement of secure payment into the app
- Use Firebase modules – analytics and push notification
- Use Jenkins CI for automatic build and testing

PROJECTS

04.2018 – 05.2018, Karma Auth (document recognition), Moscow **Android Developer**

- Creation of android application prototype for recognition documents, using Google Vision and OpenCV, in frame of IT Competition – Karma Hackaton

06.2015 – 11.2015, Artera (audioguide listening service), Moscow **Android Developer**

- Development of software for museums and art-objects audio-guides
- Creation of android application prototype in frame of IT StartUp Competition – Technostart 2015 (provided by Mail.Ru Group), the app was awarded with a grant.
- Realization of indoor location in museums with iBeacon and Eddystone technologies

02.2015 – 06.2015, Musix (music streaming service), Moscow **C++/Qml Developer**

- Development of cross-platform app for free music listening with QT framework
- Implement of adaptive UI in all supported platforms with Qml (developed by Qt)

EDUCATION

09.2012 – 07.2018 Bauman Moscow State Technical University Specialist of Laser and Optical Technology

09.2017 – 12.2017 Technopark Mail.Ru Group Development of iOS applications

02.2015 – 02.2016 Technopark Mail.Ru Group System Architecture

Courses taken: Advanced C/C++ development, Algorithms and Data structures, Java development, Web technologies, Frontend development, Databases, Development of UI, Soft Skills

SKILLS

General: Java SE 7/8, Android Studio, Android SDK 16+, Gradle

Architecture: Clean architecture, MVP

Design: StarUML, MySQL Workbench, JetBrains DataGrip

Prototyping: Sketch, Invision, Zeplin, Magnetic whiteboard

Testing and Automation: junit, Mockito, LeakCanary, Jenkins, TeamCity

LANGUAGE

English – intermediate

Russian – native speaker
