WORK EXPERIENCE

Stealth startup (fintech/crypto) · 06.2026 – 07.2026 · Mobile Lead · Portugal (remote)

- Led the mobile team and building from scratch to beta in 1 month a KMP app for Android and iOS.
- Designed mobile architecture and core infrastructure (auth, navigation, security, etc.).
- Set up the CI/CD/LLM pipeline from zero (PR checks, automated tests, nightly builds, skills, agents).
- Tuned animations and performance in Compose and adapted KMP modules for iOS

Revolut (fintech) · 05.2025 – 06.2026 · Android Engineer · Portugal (remote)

- Building a new scalable business banking product from scratch (Kotlin, Coroutines, Flow).
- Working in a small, fast-paced cross-functional team, owning features from discovery to release.
- Actively leveraging AI tools to speed up delivery while maintaining high coverage and stability.

GoGoals (productivity/AI) · 06.2023 – 04.2025 · Founder / Senior Android Engineer · Portugal

- Bootstrapped an AI-powered productivity app from idea to live app on Google Play.
- Pitched to incubators in EU and US, securing acceptance from 2 programs and validating market fit.

Yandex · 04.2019 – 03.2023 · Russia

Dzen (video/browser) · 11.2020 – 03.2023 · Team Leader / Senior Android Engineer

- Increased average user time spent on video content from ~5% to ~50%, making video the most viewed content type in the apps.
- Led the Android video team (8 engineers) responsible for video features in Yandex.Zen and integrations into Yandex Search and Yandex Browser with 20M+ daily active users.
- Designed a new efficient component system for embedding video layouts across the apps.

Sloy(video/AR) · 04.2019 – 11.2020 · Android Engineer

- Built and led a small Android team for a fashion AR startup (Sloy) and released the app in stealth mode within 9 months.
- Designed and developed the app using Clean Architecture and a multi-module system.
- Implemented MVVM and MVP patterns in the UI layer to enhance maintainability and scalability.

Other experience

- Android Engineer at Avalanche (2024–2025): built Android layer for a marketplace app (React Native).
- Android Engineer at Visitech (2017–2019): developed a B2B tablet app for field engineers.
- Android Engineer at Coffice (2016): developed an Android app for ordering coffee capsules.

SKILLS

Programming: Kotlin (Advanced), Java (Advanced), Swift, C++, Android SDK, Jetpack Compose, Coroutines/Flow, Room, Hilt/Dagger, Retrofit, Gradle
Architecture: Clean Architecture, SOLID, System design, TDD, MVVM/MVI/MVP, multi-module projects
Testing & Automation: Unit & UI testing (JUnit, Mockito, Espresso, Kaspresso), CI/CD (Jenkins, TeamCity), performance & memory profiling
AI: Cursor, Claude, Gemini, multi-agent workflows, cost optimization, rules, skills, agents, MCP
Publishing & Analytics: Play Store publishing (from scratch), release pipeline, A/B experiments, product metrics, crash-free rate, ANR monitoring
Leadership: team leadership, mentoring, product ownership, hiring, conflict resolution, public speaking
Languages: English (C1), Russian (Native), Portuguese (A1)

EDUCATION

Bauman Moscow State Technical University · 2012–2018 · Russia

- Specialist (equivalent to M.Eng.) in Laser and Optical Technology

Mail.Ru Group Technopark · 2015–2017 · Russia

- System Architecture & Mobile Development programs
