SUMMARY

AI-powered **Senior Android Engineer** with **10+ years** of experience delivering high-impact mobile products in fintech, video, and productivity, including apps with **20M+ daily active users**. Expert in Kotlin, Jetpack Compose, Coroutines/Flow, and scalable Android architectures, with a track record of improving engagement and business metrics, leading teams, and shipping complex features end-to-end. Actively leverages AI tools (Cursor, Claude Code, multi-agent workflows) to speed up implementation while keeping code quality and reliability high.

SKILLS

Programming: Kotlin (Expert), Java (Expert), Swift (Intermediate), C++ (Intermediate), Android SDK, Jetpack Compose, Coroutines/Flow, Room, Hilt/Dagger, Retrofit, Gradle

Architecture: Clean Architecture, SOLID, System design, TDD, MVVM/MVI/MVP, multi-module projects

Testing & Automation: Unit & UI testing (JUnit, Mockito, Espresso, Kaspreso), CI/CD (Jenkins, TeamCity), performance & memory profiling

AI: Cursor, Claude Code, Gemini, multi-agent workflows, cost optimization, rules, MCP

Publishing & Analytics: Play Store publishing (from scratch), release pipeline, A/B experiments, product metrics, crash-free rate, ANR monitoring

Leadership: Team leadership, mentoring, product ownership, hiring, conflict resolution, public speaking

Languages: English (C1), Russian (Native)

WORK EXPERIENCE

Revolut (fintech) · 05.2025 – Present · Android Engineer · Portugal (remote)

- Building a new scalable business banking Android product from scratch (Kotlin, Coroutines, Flow).
- Working in a small, fast-paced cross-functional team, owning features from discovery to release.
- Actively leveraging AI tools to speed up delivery while maintaining high coverage and stability.

Avalanche (marketplace) · 07.2024 – 02.2025 · Senior Android Engineer · Portugal

- Worked on a React Native-based marketplace assistance app, ensuring robust integration and data flow between native Android and JS code.

GoGoals (productivity) · 06.2023 – 07.2024 · Founder / Senior Android Engineer · Portugal

- Bootstrapped a B2C product (AI-powered task management app) from idea to live Android app on Google Play: conducted market and competitor research, defined MVP scope, and built the app using modern Android stack.
- Set up analytics and real-user testing loops to validate product decisions and improve retention.
- Launched advertising campaigns to acquire early users and pitched the project to incubators.

Yandex (video/browser) · 11.2020 – 03.2023 · Team Leader / Senior Android Engineer · Russia

- Led the Android video team (8 engineers) responsible for video features in Yandex.Zen and integrations into Yandex Search and Yandex Browser with 20M+ daily active users.
- Increased average user time spent on video content from ~5% to ~50%, making video the most viewed content type in the apps.
- Designed an efficient component system for embedding video layouts across the app.

Yandex (video/AR) · 04.2019 – 11.2020 · Android Engineer · Russia

- Built and led a small Android team for a fashion AR startup (Sloy) and released the app in stealth mode within 9 months.
- Designed and developed the app using Clean Architecture and a multi-module system.
- Implemented MVVM and MVP patterns in the UI layer to enhance maintainability and scalability.

Earlier experience

- Android Engineer at Visitech (2017–2019): developed a B2B tablet app for field engineers.
- Android Engineer at Coffice (2016): developed an Android app for ordering coffee capsules.

EDUCATION

Bauman Moscow State Technical University · 2012–2018 · Russia

- Specialist (equivalent to M.Eng.) in Laser and Optical Technology

Mail.Ru Group Technopark · 2015–2017 · Russia

- System Architecture & Mobile Development programs
